

# Sales Team CRM - Requirement

## Step 1: Dashboard

The dashboard provides a high-level overview of the sales funnel based on the AIDA model to track progress.

**Total Contacts:** The cumulative number of unique leads and customers in the system.

**Awareness:** Leads who are aware of the service but have not yet expressed interest.

**Interest:** Leads who have engaged with the team and requested information.

**Desire:** Leads who are actively considering the product or service and moving toward a decision.

**Closure:** Leads who have successfully converted into customers.

## Step 2: Daily Call Log & Customer Management

This module allows the team to manage daily interactions and maintain accurate records.

- **Add New Customer:** A dedicated form to input new lead details into the database.
- **Search Functionality:** Ability to quickly locate existing records using:
  - Customer Name
  - Mobile Number
  - Company Name
- **Activity Logging:** Capability to add detailed notes after every call for record-keeping.
- **Follow-up Reminders:** Automated or manual scheduling of follow-up tasks to ensure consistent communication.

## Step 3: Comprehensive Reporting

A consolidated view of the database for performance tracking and pipeline management. Each entry should include:

- **Name:** Primary contact person.
- **Company Name:** Associated organization.
- **Mobile Number:** Direct contact number.
- **Note:** Summary of the last conversation or general status updates.
- **Current Status:** The lead's position in the sales funnel (Awareness, Interest, Desire, Closure).
- **Estimation:** The projected value of the lead or potential deal size.

## Step 4: Settings

System configuration to manage user roles, notification preferences
